

Industrial automation and control

Technical information

- Design and manufacture of instrumentation, control and automation systems
- Electrical panel construction
- Installation and commissioning
- Maintenance and support
- Training, mentoring, skill development and capacity building

Features

- Robust and reliable
- Using industry standard communication protocols
- User-friendly customer interface
- Ease of use pre-programmed operator decision support systems
- Recipe management for high quality reliability and repeatability
- Fault finding diagnostics and data logging for root cause analysis
- Remote diagnostics and data statistics
- 24-hours local maintenance and support

Applications

- Food, feed, agro-processing and industrial applications
- Stand-alone control systems
- Fully integrated plant control and automation systems
