

VIBRATING SPREADER SIEVE

Applications

- Fines removal from different products
- Efficient sifting and classifying of products
- Continuous feeding of products to downstream equipment
- Even spreading of products for smooth infeed to downstream equipment

Technical information

- All parts in contact with the product are made from food grade stainless steel
- Large sieving area
- Vibrator motor's angle is adjustable for flexible feed rates and fines removal
- Different screen hole sizes and geometries depending on application

Features

- Meet food safety requirements
- Hygienic design with easy cleaning
- Clamp below for fines collection bag
- Spring connection to isolate vibration from frame
